

Despite Delta variant fears, leasing reached its highest quarterly total since the onset of the pandemic

New York's office market exhibited signs of vitality during the third quarter as demand surged and availability held steady. Leasing activity measured 7.7 million square feet (msf) for the quarter, up 55.8% from the second quarter, even as many companies delayed their return-to-office plans on the heels of Delta variant concerns. While leasing activity has remained below historical levels since early 2020, demand during the quarter was just below the 8.1 msf third-quarter-average during the five years preceding the pandemic. Renewed interest in office space was not limited to leasing activity—physical office occupancy for the New York Metro measured 28.1% in September, according to Kastle Systems, the highest level since the beginning of the pandemic and up from 13.9% in March. While demand improved significantly, it has not begun to chip away at market's bloated availability, which will likely remain well-above historical averages for the foreseeable future.

Availability rate holds steady, but remains at an all-time high despite decreasing sublease space

Manhattan's availability rate stands at 18.4% for the second-consecutive quarter, compared to the market's five-year average of 10.8% prior to COVID-19. This ends an eight-quarter surge in availability that pre-dated the coronavirus outbreak. Since the beginning of the pandemic, the market's availability rate has risen by 690 basis points (bps) as demand remained well-below supply. While available sublease space soared in 2020, it is now 5.6% below its peak during the first quarter of 2021. Conversely, direct space dominated newly available supply in 2021 with the amount of available direct space up 31.2% year-to-date. Geographical differences persisted as Downtown's availability rate rose by 40 bps to reach 21.0%, while Midtown South's tightened by 120 bps to 18.7% and Midtown's increased by 20 bps to 17.5%.

Asking rents drop slightly, effective rents continue to decline

Even as demand strengthened, average asking rents decreased by 0.7% during the third quarter to reach \$75.08, per square foot (psf) down 10.5% since Q1 2020. Class A asking rents also dropped by 0.7% over the quarter and are 11.6% below pre-COVID levels. Landlords continue to push asking prices, however, taking rents and concessions have further widened the gap between asking and effective rents. Asking rents in Midtown South rose 0.2% over the quarter to \$80.13 psf, surpassing Midtown (down 0.9% to \$79.67 psf) for the first time since 2019. Meanwhile Downtown asking rents dropped 1.0% to \$59.18 psf.

Outlook

- Availability may increase again in coming quarters as two 1.5-msf blocks at 2 Manhattan West and 60 Wall Street fall within 12 months of tenant occupancy
- Even if demand continues to rebound, the market will not likely reach supply-demand equilibrium for several quarters given the amount of space currently available
- Effective rents will continue to decline in the coming quarters as owners continue to face competition to attract and retain tenants

KEY STATISTICS

	Q3 2020	Q3 2021	y-o-y Change
